

Jamison Door Company

Jamison has been the first choice in cold storage doors since 1906. Jamison makes a full product line of doors: horizontal sliding, vertical, overhead, Plyfoam, entrance and custom specialty. Jamison's most popular line, the horizontal slider, comes either as a single-leaf or bi-parting, electric or manual operation. The new InVisions 2000 is a clear panel door for areas that require quick opening and clear vision from both sides of the door. The vertical and overhead doors are extremely versatile with many design configurations. Pre-assembled track and angles make installation quick and easy. Jamison doors are the lowest total cost to own.
