

## Turbo uChiller Water Chiller

Turbo's uChiller is the latest "no frills" water prechill solution and the most cost effective, uninsulated HTD/HF liquid heat exchanger. The uChiller's flexible design allows you to prechill your ice making water to within one degree of the freezing point.

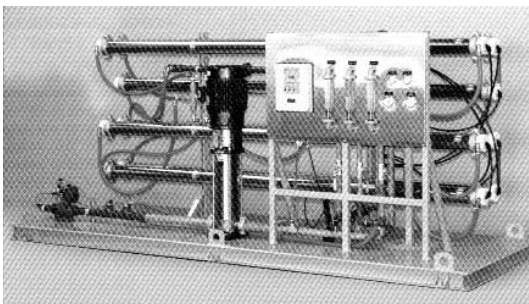

### FEATURES:

- Stainless steel construction
- R-22, ammonia and Glycol refrigerants
- From one to seven 48-inch plates
- Flexible, cost effective design
- Durable and reliable
- Easy access for cleaning with hinged top and end doors

## Alamo Water Improvement Systems

Alamo supplies the water treatment industry with one of the largest product inventories available. Alamo builds both standardized systems that can be quickly adapted to your requirement and custom to customer specifications. Alamo offers water softeners, deionizers, filters, high output R.O., ozonation, ultraviolet and other systems. Because certain water treatment equipment can be harmful if not installed or used properly, a trained water treatment professional should be consulted. Alamo has been a trusted name for over 30 years.

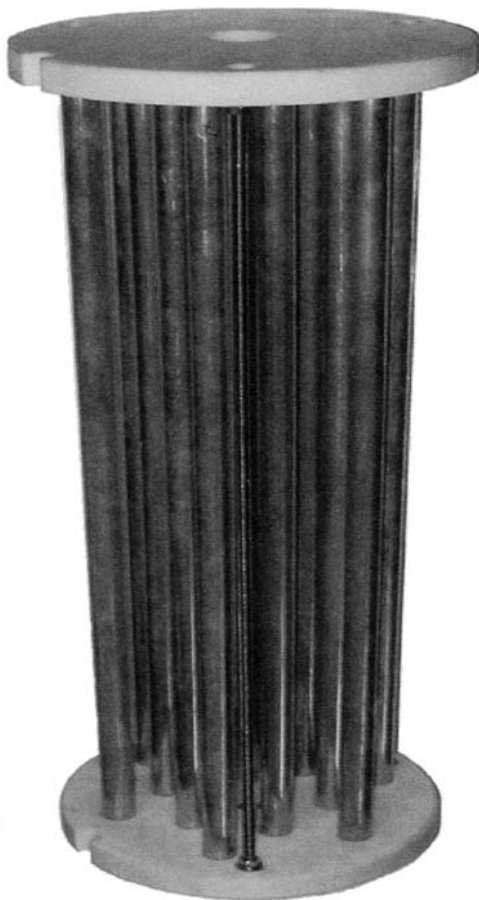

## Goldenrod Water Treatment

Goldenrod technology prevents the buildup of scale deposits in aqueous systems.

### FEATURES:

- Provides cleaner, chemical-free equipment operation
- Discourages mold and slime buildup
- Easy to install and maintain
- Allows for better heat transfer resulting in reduced energy costs
- Eliminates costly filter cartridge replacements
- Reduces or eliminates the use of chemicals
- Better heat transfer and lower head pressures
- Reduces maintenance costs
- Industrial applications up to 8"
- Flow rates to 1,200 GPM

System Applications	Model No	Maximum G.P.M.	List Price
Ice Mach./Cooling	W05	13	\$470
Ice Mach./Cooling	W09	25 ✓	\$525
Coffee/Ice/Cooling	W065	3.5	\$325
